U2 can have two way radios from Brentwood Communications

Brentwood Communications were approached by the organisers of the award winning event security and crowd management company Showsec to provide a two way radio communications solution for their crowd management at high profile venues.

Their specification was simple. To provide robust and reliable equipment able to withstand all kinds of weather and terrain and able to withstand high usage throughout the entire events.

With such high profile gigs such as U2 at Wembley and Blur at the O2, we had to provide tried and tested radio technology and the client had to be sure that the radios would have 100% up time. Radio failure at such high profile events was not an option.

Environment: Stadiums

Noise Levels: Very high

Users: 20-50 users

Solution overview

With a simple and yet stringent criteria we suggested Showsec use Motorola GP340 two way radios. With enhanced battery life, superior and loud audio these robust and reliable radios have the benefit of experience within the industry. These radios have been used in some of the most high profile events throughout the world for decades.

What is more, here at Brentwood Communications we have the expertise and on-site capabilities to manage the most sophisticated two way radio requirements. Motorola technology is very easy to use, and barely any on site training is needed.

A range of ear pieces were also supplied with the radios, all tried and tested. To combat noise at their various venues we also supplied noise cancelling heavy duty headsets.

We suggested the Motorola GP340 Portable handheld radio. Each radio came with a lithium ion high capacity battery, belt clip and charger.

System Benefits

- 100% Coverage
- Lightweight Portable Radios
- Call Logging
- Multi Channel Radio
- Group Calls
- Emergency Feature
- 5 Watts Output

Our services

- Coverage Survey and Report
- Radio Frequency and Channel Design
- OFCOM License Application
- Radio System and Antenna Design
- System Maintenance
- Radio System and Antenna Installation
- Testing and Commissioning
